

QUASATEK

Deliver Trust and Quality

COMPANY PROFILE

Quasatek Standard Technical Services

OUR VISION

Qua

Sa

Tek

Quality

Safety

Trust

Quasatek comes from **Quality**, **Safety** and **Trust**, which are the core services we strive to deliver to our clients.

OUR MISSION

- **Our Mission: Deliver Trust and Quality!**
- Quasatek, as an independent quality control service provider, can provide you with a professional and quick-response service and a feeling of trust as well. Quasatek is the gear you need!

OUR COMPANY

- Quasatek is an US-managed, Asia-based inspection auditing and testing company.
- Through our **on line service system** and about **100 fulltime inspectors** and **55 auditors** in Asia, you can book our service within **1 hour** and get the result you want within **48 hours**.

OFFICES IN CHINA MAINLAND

OUR SERVICE

Our core services can be divided into 3 categories:

- **Inspection**
- **Audit**
- **Testing**

INSPECTION SERVICE

- Pre-shipment inspection
- Production Monitoring
- During Production Check
- Initial Production Check
- Container Loading Check

PRE-SHIPMENT INSPECTION

- When 80% of your order is complete, an inspector visits the factory and uses industry standard processes to comprehensively review and test your product, ensuring it meets agreed upon specifications.
- **Why You Need a Pre-Shipment Inspection:** Don't take any risks with your order. Ensure the product you pay for meets your specifications before you settle final payment.

PRODUCTION MONITORING

- For challenging or sensitive orders, have an inspector monitor your production and report daily to identify and fix problems in real-time.
- **Why You Need Production Monitoring:** Production Monitoring puts an inspector onsite during the production cycle, representing your interests, to ensure production, materials, quality, schedules are at the level you and your manufacturer initially agreed upon.

DURING PRODUCTION CHECK

- A During Production Check (DUPRO) will identify any issues early in the manufacturing cycle, giving you the time needed to react and fix them.
- **Why You Need a DUPRO:** When around 20% of production is complete, take a deep dive into your production, processes, capacity, and goods and then make critical decisions at an early stage, and avoid potentially catastrophic surprises later in the production cycle.

INITIAL PRODUCTION CHECK

- An Initial Production Inspection will ensure your specifications are understood by the factory and to prevent any potential flaws in the production resources, materials, schedules, management and more.
- **Why You Need an Initial Production Check:** Avoid quality-related surprises during or after production. At the time of the IPC, consider Lab Testing services for quality assurance on materials.

CONTAINER LOADING CHECK

- Container Load Check is the final step in the manufacturing process. Ensure the final details of your product are correct and actual ordered quantity are securely loaded onto your container before signing off and settling final payment.
- **Why You Need a Container Load Checking:** Put an inspector onsite at the time of loading, to guarantee the product paid for is securely loaded.

AUDIT SERVICE

- **Quality Management Audit**
- **Social Compliance Audit**
- **C-TPAT Audit**
- **Food Factory Audit**

AUDIT SERVICE

- By now, there have been more than **55 auditors** in our Asia Division, which could cover all around **China, Thailand, Bangladesh and Vietnam**. In this way, our people could provide the most on-time and efficient audit service to our customers.
- On the other hand, our localization make us understand the local laws, regulations and relative standards better, learn the way of local acting better, which could make sure that all the information provided to you is the fair, justice and transparent. You could learn the actual status of your venders from our reports, and finally find your qualified vendors.

TESTING SERVICE

- With our online platform you quickly find all the tests you need. Select your product category, country of manufacture, destination country.
- Testing with Quasatek allows you to seamlessly integrate your Laboratory Testing with your Product Inspection. Guarantee the sample is from your production lot, not a sample the factory wants you to test.

OUR PRICING

- Our "man-day" rate in China is as below form, there are no hidden costs or extra expenses.

		Price Per Man-day	
		China Mainland	TW, TH, VN, BD,IN

- Inspection Report and Inspection certificate issuance.

WHY QUASATEK

■ Experience & Efficiency

We have partnered with the world's leading inspection parties and lots of buyers to implement inspection services. This allows us to offer a "best practices" program saving you time and money.

■ Global Resources

With locations around Asia, including China, Vietnam, Thailand, Bangladesh and India, we can assess and monitor your suppliers in a variety of locations.

■ Integrity & Ethics

Our dedicated integrity team manages a 'Unannounced Assessment' program to minimize the risks of corruption and to educate auditors, factories and clients regarding our integrity policies and expectations. You are also welcome to contact our GM of Asia Direction by Cell phone directly (See the last Page).

WHY QUASATEK

■ Operational Excellence

With specialized auditor/inspector training and standardized global operations, we can deliver high quality and consistent service to you.

■ On-Line Advantage

Quasatek has invested heavily in developing an industry-leading IT service infrastructure. This investment makes it easy for our clients to quickly and easily manage scheduling, access reports and engage account managers for inspections, audits and testing, all via the web. Through our on line service system and about 100 inspectors and 55 auditors in Asia, you can book our service within 1 hour and get the result you want within 48 hours.
